Hiring Manager

Ipsos

Cambridge, UK

18 September 2026

Dear Hiring Manager,

I am writing to express my enthusiasm for the Junior Software Engineer position within the Audience measurement team at Ipsos. After reviewing the role, I am excited by the opportunity to contribute to the development and optimisation of Ipsos's audio recognition technology—an area that aligns strongly with my technical interests, academic background, and passion for problem-solving.

I bring a solid foundation in programming, particularly in Python and C++, and a growing interest in digital signal processing and algorithmic optimisation. The role's focus on enhancing patented audio recognition algorithms and diagnosing real-world audio processing limitations resonates with my curiosity for understanding systems from first principles and improving them through structured experimentation. I am eager to apply my analytical mindset to exploring new solutions, assessing performance, and supporting the continuous evolution of Ipsos's technology deployed across multiple countries.

Collaboration is central to my working style. I enjoy contributing to design discussions, learning from experienced engineers, and communicating clearly with both technical and non-technical colleagues—skills I have strengthened through academic projects and hands-on development work. I am particularly drawn to Ipsos's emphasis on innovation, cross-functional teamwork, and maintaining high-quality, deployable software. The opportunity to grow under the guidance of seasoned professionals is one I value deeply.

Ipsos's commitment to inclusivity, flexible working, and professional development further motivates me to join your organisation. I am confident that my enthusiasm, adaptability, and determination to learn new technologies quickly will allow me to make meaningful contributions to the Audience Measurement team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and motivation align with Ipsos's mission to deliver accurate, impactful media measurement solutions.

Warm regards,

Emmanuel Ugwu
